Student Agreement for the Use of Artificial Intelligence (AI)

The following outlines fundamental principles and guidelines for utilizing AI while studying at Tornillo ISD, utilizing school IT equipment and services. This policy covers any generative AI tool, whether stand-alone products or integrated into productivity suites, e.g., Microsoft 365 and Google Workspace. This policy relates to all content creation, including text, artwork, graphics, video, and audio.

Appropriate Student Use of AI at Tornillo ISD

- You may not use AI tools to generate content (text, video, audio, images) that will end up in your homework, activities, and responses unless you are specifically told that you may do so by your teacher.
- There are situations and contexts within the school where you will be asked to use AI tools to enhance your learning and to explore and understand how these tools can be used.
- With regards to coursework completion, you may not use AI tools unless you are given permission by teachers. If you have not been given this permission for a task, you may not use these tools. Such decisions will be made by the teacher of record and will apply to all students who take the subject.

Below are a series of key points to think about before using AI tools:

- Please ask your teacher if you need clarification or have questions before using AI for any assignment.
- You may use AI programs such as ChatGPT to help generate ideas. However, you should note that the material generated by these programs may be inaccurate, incomplete, or otherwise problematic. You should check and verify ideas and answers against reputable source materials.
- Large language models (LLMs) tend to make up incorrect facts and fake citations. Code generation models tend to produce inaccurate outputs. Image generation models can produce biased or offensive products. You will be responsible for any content you submit, regardless of whether it originally comes from you or a foundation model.
- You must indicate what part of the assignment was written or created by AI and what was written or created by you. You may not submit any work generated by an AI program as your own.
- The submission of AI-generated answers constitutes plagiarism and violates Tornillo ISD's Student Code of Conduct.

We reserve the right to use AI plagiarism detectors or our academic discretion to detect improper uses of AI.

AI Misuse for Examinations

AI tools must only be used when the conditions of the assessment permit the use of the internet and where the student is able to demonstrate that the final submission is the product of their own independent work and independent thinking.

Examples of AI misuse include, but are not limited to, the following:

- Copying or paraphrasing sections of AI-generated content so that the work is no longer the student's own.
- Copying or paraphrasing whole responses of AI-generated content.
- Using AI to complete parts of the assessment so that the work does not reflect the student's own work, analysis, evaluation, or calculations.
- Failing to acknowledge use of AI tools when they have been used as a source of information.
- Incomplete or inadequate acknowledgement of AI tools.
- Submitting work with intentionally incomplete or misleading references or bibliographies.

AI Misconduct Policy

There will be consequences for breaking our trust in you to use and learn from AI tools responsibly.

- Any plagiarism or other forms of cheating will be dealt with under the school's policies.
- Your AI privileges may be curtailed, even when allowed in your coursework.
- Tornillo ISD's policy on plagiarism still applies to any improperly cited use of human work or submission of work by another human as your own.
- When it relates to assignments, pupils will be required to sign authentication statements, and any suspected misuse of AI will need to be reported to the relevant awarding body. All cases of academic misconduct will be referred to the administrator.

Please sign below to confirm that you understand and agree to abide to the AI policies outlined.
